

PRESS RELEASE

The 1st ORACLE™ System (by CEM) in Greece

Athens, March 2026: With great pride, we announce the **first installation** in Greece of the innovative **ORACLE™** system by **CEM Corporation** for fat determination in dairy products in accordance with **ISO 16756 / IDF 259**. The installation was carried out at **Hellenic Dairies S.A.** by **HELLAMCO S.A.**

The **ORACLE™** system determines fat content in all types of food (meat, etc.). At the same time, it is the **only** system worldwide that meets the requirements of **ISO 16756 / IDF 259** for **dairy products**, achieving:

- ✓ **Solvent-free** analysis (environmentally and user-friendly)
- ✓ **No calibration** required
- ✓ **Absolute accuracy and repeatability**
- ✓ **Results in less than 1 minute**

The investment by **Hellenic Dairies S.A.** in **ORACLE™** confirms its ongoing commitment to innovation, quality, and the implementation of international control standards. This choice further enhances the **reliability** of analyses, the **speed** of decision-making, and the assurance of consistent product **quality**, with internationally recognized compliance.

HELLAMCO S.A., the exclusive representative of **CEM Corporation** in Greece and Cyprus, offers the system throughout Greece, providing full technical and scientific support as well as comprehensive after-sales service, ensuring maximum return on investment.
